Our
Contribution

Loyola Project for the Innocent

The Loyola Law School Project for the Innocent (LPI) aims to help exonerate the wrongfully incarcerated.

The Problem

The more time attorneys spend processing transcripts, the less court cases they can take on each year.

Huggingface

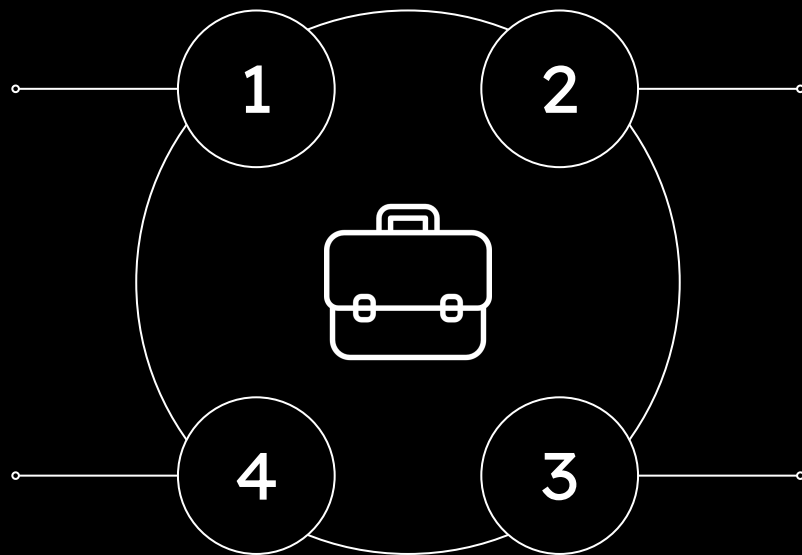

Backend

Python, Flask, Firebase,
ElasticSearch, AWS
RDS, PostgreSQL

NLP Pipeline

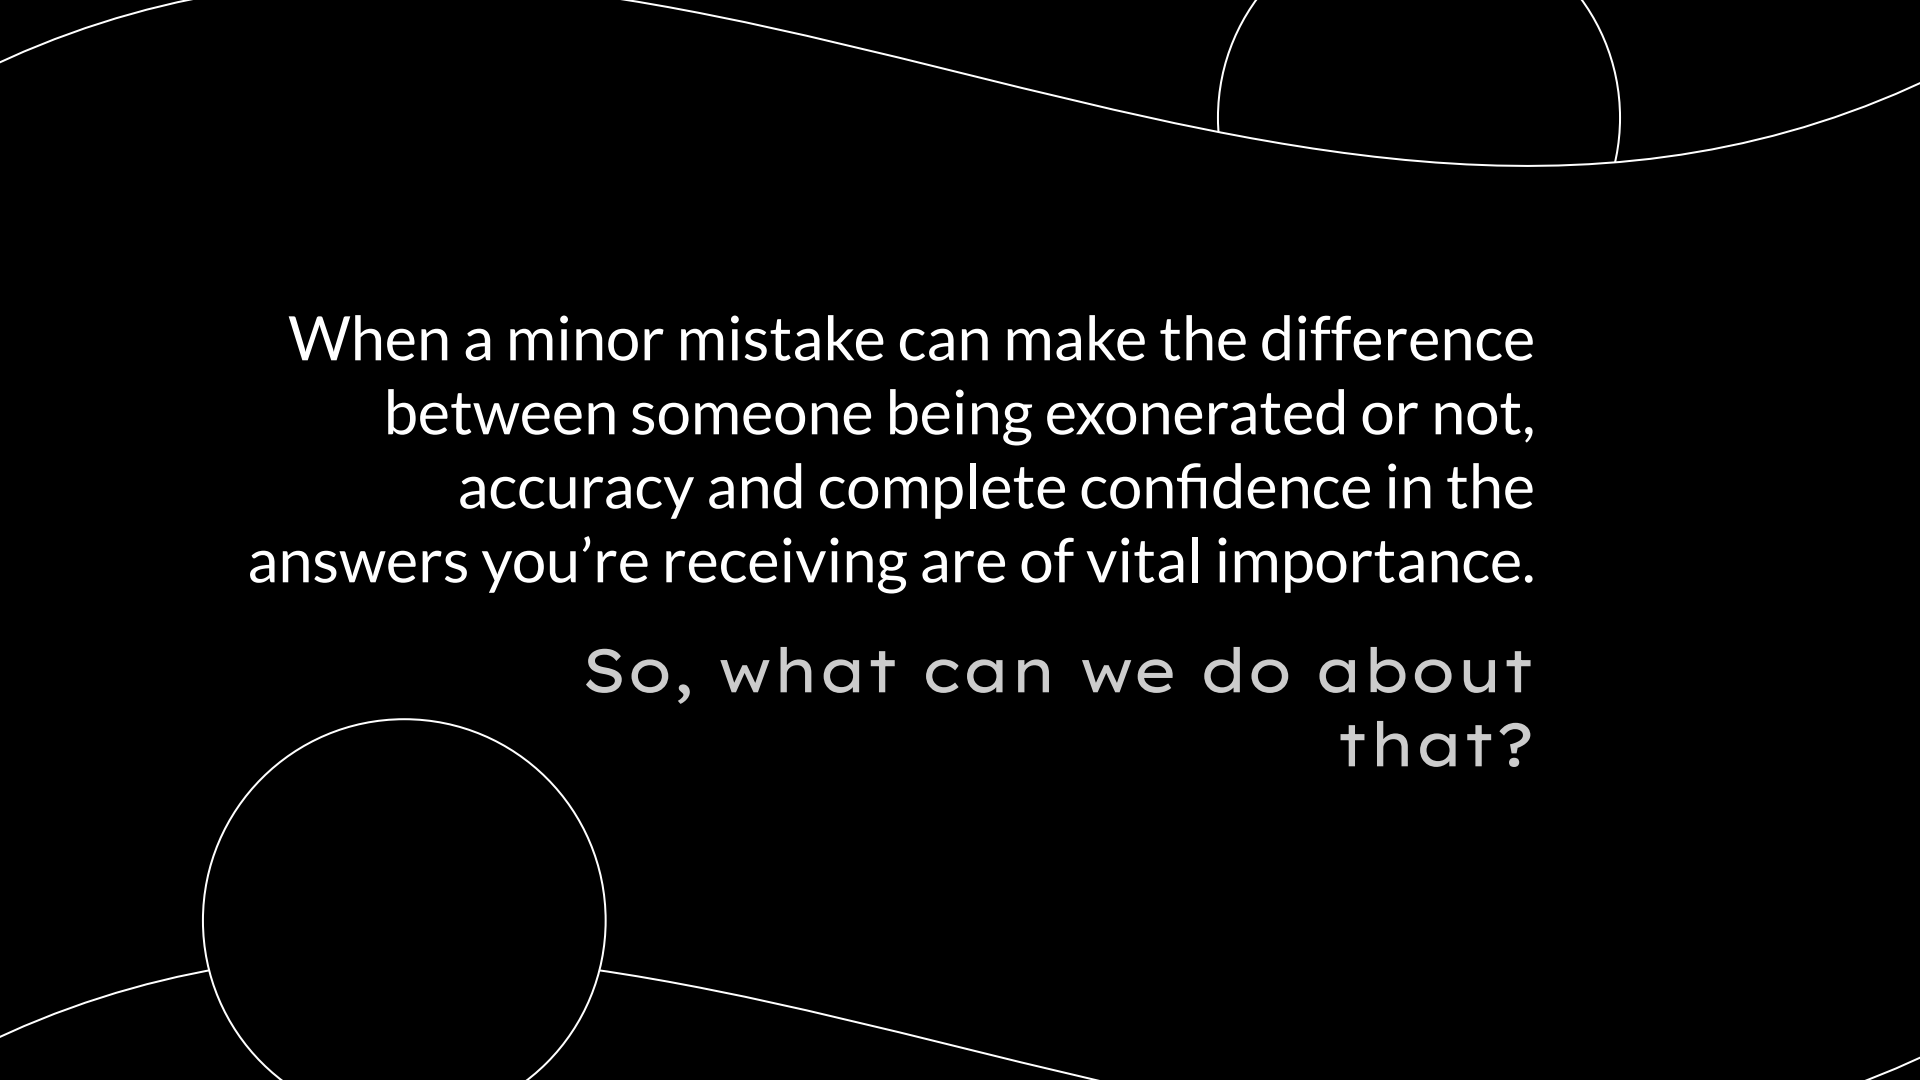

**Legal
Transcript**
Low resolution, long
ass document

**High-Level
Analysis**
Summarization,
chatbot, tagging,
characters

**Text
Extraction**
OCR + Clustering
System for messy
text

**Assign
Structure/
Relationship**
POS tagging, NER,
rule-based matching

When a minor mistake can make the difference
between someone being exonerated or not,
accuracy and complete confidence in the
answers you're receiving are of vital importance.

So, what can we do about
that?

Features

OCR

Confidence scoring +
text flagging

Summary

Evidence based
summarization

DocChat

More reliable citation
system

Evaluation

Performance assessment through direct
feedback sourcing

Thanks!
